Summary

A detail-oriented team player with high integrity pursuing a challenging position in information technology. Skilled in web development, database design, facilitating, and technical writing.

Education

B.S. Information Technology – Arizona State University – Graduated May 2020

B.S. Hotel and Restaurant Management – Northern Arizona University – Graduated May 2003

Relevant Projects

Senior Capstone Project – Arizona State University – August 2019 to May 2020

- Designed a web application for parents to sign their scout into den meetings, den leaders to record requirements worked on during den meetings, and the scoutmaster team to view attendance and requirements.
- Reduced sign-in time to less than 5 minutes, increased parent participation in the scout sign-in process to 100 percent and eliminated the misplacement of paper copies by 100 percent.

Term Project – Arizona State University – January 2020 to May 2020

- Created a website for an imaginary solar research and development laboratory which included custom user registration and a dashboard where registered users could perform CRUD operations related to solar panels.

Project Manager and Database Architect - Class Project – Arizona State University – May 2017

- Served as a technical architect and designed and implemented the database solution.
- Assigned tasks and held team members accountable for delivery of the assignments.
